## PROJECTS

---

- Ramen Reviews** Blog created to showcase the best ramen restaurants on Long Island. Features included in this full stack application include
- Ruby on Rails RESTful API ([code](#))
  - React.js front-end ([code](#))
  - User authentication with Devise
  - User authorization with Pundit
  - Reusable Components and CSS modules
- Watch Store** Backend of the watch store ecommerce site.
- Ruby on Rails RESTful back-end ([code](#))
  - User authentication with Devise
  - Stripe Checkout
  - TaxJar tax calculation API
- Personal Website** Fully responsive app displaying projects, contacts, and personal info.
- React.js front-end ([code](#))
  - Custom UI
- Currency Converter** Python program designed to interact with a user to convert one desired currency to another. Features type checking and input validations. First step in creating a full-stack application with React and FastAPI. ([code](#))
